Agriculture is Awesome! Contest

Agriculture not only gives riches to a nation, but the only riches she can call her own. Samuel Johnson, English author (1709-1784)

My mother found this quote. It's perfect for this because it explains that agriculture is so important to our everyday lives. For instance Tennessee's top crops are soybeans, cotton, corn, and tobacco.

One of those crops is corn. Corn is one that is used in so many products that we use every day and we probably wouldn't even suspect that it was in these products.

For example, corn or some derivative (something that comes from it) is used to make:

Toothpaste
Match Sticks
Gas and Oil
Crackers
Soda
Chips
Shampoo
Jelly Beans
Diapers
For Sticks
Coated Aspirin
Spark Plugs
Windex

Agriculture is awesome!
