The TMNP Program is offered online through the University of Tennessee Extension online learning system, or extOL. The program consists of 21 modules that are each about one hour long. An online exam is taken following completion of the last module. Topics include:

- Marketing and Economics
- Field and Container Production
- Irrigation
- Plant Nutrition and Fertilization
- Pruning and Staking
- Propagation
- Pest Management

**Benefits**

Growers estimate they save on average more than $13,000 as a result of participating in the TMNP program! Put the Tennessee Master Nursery Producer Program to work for your nursery!

**Who should attend?**

Nursery owners, employees, those interested in starting a nursery, county agents, and other educators.
What is the cost?
The cost is $125.

Working with the TAEP
The Tennessee Agricultural Enhancement Program (TAEP) provides cost share assistance for long-term investments in Tennessee’s farming operations. A current University of Tennessee Master Producer Certificate is one of the qualifications needed for producers to be eligible for the maximum 50% cost share assistance. Details of the TAEP program can be found at the Tennessee Department of Agriculture’s website: www.tn.gov/taep.

I enrolled in the Master Nursery Program with the sole purpose of increasing the pay percentage of the Ag Enhancement Program. When I finished, I was eligible for the higher reimbursement but the education that I acquired will be of much more value over time.
Kim Holden, Holden Nursery
