October 11

4-H STEM DAY CAMP

Being a young person you are probably always asking, "why?" That is what science is all about. Looking around at our universe and asking "why?" and then trying to answer the questions by using tests which find the information needed to produce answers. Nurturing your natural curiosity isn't just great fun, it is one of the best things you can do for your mind. In using science to search for answers to your questions you are preparing yourself for an exciting future.

4-H STEM DAY CAMP will involve many hands on experiments, group processing, team work, and lots of creative problem solving.

Plans are to have one experiment to take home with you.

We will also have lots of icebreakers during the day too!

Grades 4 - 8

Registration Deadline is October 11th
