- Q. What does it mean for an animal to be polled? T2.3-5d  
A. No horns
- Q. Which state produces the most wheat? T5.3-5e  
A. Kansas (America's breadbasket)
- Q. Interspersion (pronounced EN-TER-SPUR-ZHUN) is necessary for many small animals such as quail and rabbit. What is interspersion? T1.6-8c  
A. Mixing of food and cover
- Q. Which state produces the most milk? T2.3-5d  
A. Wisconsin (America's Dairyland!)
- Q. Lady bugs are beneficial insects because they prey on what farm pest? T2.6-8c  
A. Aphids

- Q. What percentage of Nitrogen is contained in a 50 pound bag of 6-12-12 fertilizer? T2.6-8c  
A. Six percent
- Q. When Tennessean William Haskell Neal produced Neal's Paymaster corn, what was the new variety's great advantage? T4.3-5c  
A. Two ears per stalk as compared to one ear on the old varieties
- Q. What percentage of Phosphorous is contained in a 50 pound bag of 6-12-12 fertilizer? T2.6-8c  
A. 12 percent
- Q. What is found in some soils that stop root depth and effect homesite selection? T1.3-5e  
A. Bedrock
- Q. What crop do we use to produce margarine? T1.3-5e  
A. Soybeans
- Q. What does a Hognose Snake do when it is threatened? T1.3-5a  
A. Plays dead
- Q. Which soil characteristic is the most important to know when putting in a septic system? T1.3-5e  
A. The percolation rate or "Perc Rate" (how fast liquid can travel or perc through the soil)
- Q. What farm animal farrows its young? T2.3-5d  
A. Swine or hogs
- Q. Name my AG Career: I study better ways to manage fish in ponds, streams and even oceans. T5.3-5b  
A. Fish Biologist
- Q. In what complex is the Tennessee Department of Agriculture located? T5.3-5f  
A. Ellington Agricultural Center in Nashville
- Q. Which grand division of the state depends the most on the row crop part of Agriculture? T3.6-8i  
A. West Tennessee
- Q. Aquaculture is the science of producing what product? T1.3-5a  
A. Fish
- Q. How much does a bale of cotton weigh? T4.3-5a  
A. 480 pounds
- Q. What is the term for the soft furry covering on a deer's antlers? T1.3-5a  
A. Velvet
- Q. What official heads up the USDA? T5.3-5f  
A. The Secretary of Agriculture
- Q. A female hog before she has pigs is called a what? T2.3-5d  
A. Gilt

- Q. What is the term for the group of baby pigs a sow has? T2.3-5d  
A. Litter
- Q. What part of the dairy cow holds and stores the milk? T2.3-5d  
A. Udder
- Q. What is the term used to describe the last possible date a particular area can expect a killing frost? T4.3-5d  
A. Frost free date
- Q. What are the two state insects of Tennessee? T4.6-8f  
A. Firefly and the Lady Bug
- Q. What is the general term for the working in an industry that is sustainable, renewable and contributes to the quality of the environment? T1.6-8c  
A. "green" industry
- Q. What family of insects causes farmers the most economic loss? T4.6-8f  
A. Lepidoptera (moth and butterflies) (pronounced LEP UH DOP TUH RA)
- Q. What is the family of plants containing watermelons, squash, and cucumbers? T1.3-5e  
A. Cucurbits (CUE- CURB- ITS)
- Q. How many pounds of honey does a typical bee hive produce in a year? T4.6-8f  
A. More than 400 lbs
- Q. What are the most efficient farm animals in terms of pounds of gain to pounds of feed? T2.3-5d  
A. Chickens or Poultry
- Q. What farm animal is most susceptible to pseudorabies (pronounced SUE-DOE-RAY-BEES)? T2.3-5d  
A. Swine or Hogs
- Q. Which one of Tennessee's forage grasses is infected with an "Endophyte Fungus?" T1.3-5e  
A. Fescue
- Q. What is the agriculture term for a round bale of hay in a big plastic bag? T4.3-5d  
A. Haylage (Pronounced HAY LIJ)
- Q. What is the name of the stomach in cows, sheep and goats that is responsible for them being able to eat and live on hay and grasses? T2.3-5d  
A. Rumen
- Q. What type of crop is grown simply to conserve and develop the soil? T1.6-8c  
A. A "cover" crop
- Q. Which state produces the most cotton? T5.3-5e  
A. Texas (The Cotton Bowl!)
- Q. What is an invasive species? T2.6-8c  
A. An organism not native to an area

- Q. What noisy insect becomes a pest in the state about every thirteen years?  
A. Cicada (pronounced sa-k-dah) T4.6-8f
- Q. Tennessee's Institute of Agriculture is an important part of what university?  
A. The University of Tennessee T5.3-5f
- Q. Name my AG Career: I work for the state of Tennessee and I protect and conserve wildlife?  
A. Wildlife Officer or Game Warden T5.3-5b
- Q. What is the proper name for a single freshwater shrimp?  
A. Prawn T1.3-5a
- Q. The wool from one sheep is called what?  
A. Fleece T2.3-5d
- Q. What milk processor in Athens, Tennessee has had their ice cream ranked "one of the best in the world" by TIME Magazine?  
A. Mayfield Dairy Farms T3.6-8i
- Q. What "popular" Tennessee tree is really a magnolia?  
A. Tulip poplar T1.6-8c
- Q. What grand division of the state has the most Dairy Cattle?  
A. East T3.6-8i
- Q. What is the term for growing a plant in a water medium?  
A. Hydroponic T4.3-5d
- Q. How many frost-free days are required to grow cotton?  
A. 200 T1.6-8c
- Q. What western mammal has drifted into Tennessee causing much alarm to farmers?  
A. Coyote T1.3-5a
- Q. How many times is a dairy cow milked each day?  
A. Two times T2.3-5d
- Q. What is meant by a milk deficit state?  
A. Consume more milk than it produces T5.3-5e
- Q. What are Rat-L-Traps, Jitterbugs, and Rooster Tails?  
A. Artificial fish baits T1.6-8c
- Q. What is meant by the word gestation?  
A. Length of pregnancy T2.3-5d
- Q. Name my AG Career: I study plants and the numerous ways they can be cultivated and utilized.  
A. Agronomist T5.3-5b

- Q. Caterpillars are the larvae for what type of insect? T4.6-8f  
A. Butterflies or Moths (either is correct)
- Q. Why would you use a fungicide? T2.6-8c  
A. Kill a fungus or blight
- Q. A female hatchling chicken is called a what? T2.3-5d  
A. Pullet
- Q. Name my AG Career: I am a person entrusted with the protection and preserving of a parkland...particularly as it relates to trees? T5.3-5b  
A. Forest Ranger
- Q. In what structure is silage stored? T4.3-5a  
A. Silo
- Q. What pigs are bought small and then fed to market weight? T2.3-5d  
A. Feeder pig
- Q. What invasive insect which resembles a small June bug, preys on Tennessee's fruit trees? T4.6-8f  
A. The Japanese Beetle
- Q. Which state produces the most hogs? T5.3-5e  
A. Iowa
- Q. What is the principle ingredient in the insecticide DiPel or BT? T2.6-8c  
A. Bacteria (an organic pesticide)
- Q. What fish is generally the goal of a day of fly casting? T1.3-5a  
A. Trout
- Q. What soils are a mixture of clay, silt, and sand making them easy to cultivate? T1.3-5e  
A. Loams or Loamy Soils
- Q. What is the official sport fish of Tennessee? T1.3-5a  
A. Largemouth bass
- Q. What does the agriculture term IPM stand for? T2.6-8c  
A. Integrated Pest Management
- Q. What pest has attacked and destroyed many acres of pine trees in Tennessee? T4.6-8f  
A. Southern Pine Beetle
- Q. Which Grand Division of Tennessee produces the most hogs? T3.6-8i  
A. West Tennessee

- Q. What principal within our US Constitution makes it difficult for one person to have absolute control of the government? 4.41  
A. Separation of Powers
- Q. The 18 Amendment is often referred to by what name? 5.40  
A. Prohibition (PRO-UH-BISH-UN)
- Q. Who was the first US Secretary of the Treasury? 4.46  
A. Alexander Hamilton
- Q. What do you call a group of citizens called together to hear a legal case? 4.42  
A. Jury
- Q. What branch of government interprets the laws? 4.42  
A. Judicial
- Q. Which Article of the US Constitution outlines the powers of Supreme Court? 4.42  
A. Article 3
- Q. What happens if a vote is tied in the US Senate? 4.42  
A. The Vice-President breaks the tie
- Q. Which branch of government is responsible for signing bills into law? 4.41  
A. The Executive Branch
- Q. What was the first Amendment to be ratified in the 20th Century? 5.40  
A. The 16 Amendment

- 
- Q. During what war was the 13th Amendment to the US Constitution passed? 5.20  
A. The Civil War
- Q. What is literally the “Highest Court in the Land?” 4.42  
A. The Supreme Court
- Q. Having separate water fountains for black and white citizens was an example of what type law? 5.41  
A. Jim Crow Laws
- Q. What describes how each branch of government limits and shares powers with the other branches? 4.41  
A. Checks and Balances

- Q. What were "normal" schools?  
A. Schools founded to train teachers LSED
- Q. What are colors called that are opposite each other on the color wheel?  
A. Complementary or Contrasting VA 2.1
- Q. What is the number one state in the United States for SPAM consumption?  
A. Hawaii THES 5.
- Q. What is an ingredient that helps make bread tender?  
A. Shortening THES 5.
- Q. In what town is Austin Peay State University located?  
A. Clarksville LSED
- Q. Which class of fire involves wood, cloth, and paper?  
A. Class "A" fire THES 10
- Q. What is defined as the influence your contemporaries or friends have upon you?  
A. Peer Pressure THES 13
- Q. What is the method of drawing done without any help from any drawing instruments?  
A. Freehand VA 1.3
- Q. Most fast foods are high in fat and what?  
A. Sodium THES 5.
- Q. What are you required by Tennessee state law to do each time you ride in a car?  
A. Wear seat belt THES 10
- Q. At what temperature should your home freezer be set on?  
A. 0 degrees Fahrenheit THES 5.
- Q. What is the maximum time that left-overs can be left out at room temperature?  
A. Two (2) hours THES 5.
- Q. What is the tool used to study color schemes?  
A. The Color Wheel VA 2.1
- Q. What is the main use of an emery bag on a pin cushion?  
A. To keep needles and pins sharp VA 1.1
- Q. Exercise makes your bones what?  
A. Stronger THES 4.
- Q. What is the name given to an earthquake which follows another earthquake?  
A. An Aftershock THES 11

- Q. One gram of fat contains how many calories?  
A. 9 THES 5.
- Q. What machine has a needle bar, a throat plate, and a bobbin?  
A. Sewing machine VA 1.1
- Q. How often should you have a dental check-up?  
A. 2 times per year (every 6 months) THES 2.
- Q. What is the name of a paper or board with openings that let paint or ink through to make a design?  
A. Stencil VA 1.1
- Q. What is the approximate size of a lightning bolt?  
A. Only 3/4 inch THES 11
- Q. What is the name of the three-legged supporting stand used to hold a camera steady?  
A. Tripod VA 1.1
- Q. What mineral helps the thyroid gland to work properly and is usually found in salt?  
A. Iodine THES 5.
- Q. What is defined as the ratio of lean body weight to fat body weight?  
A. Body composition THES 5.
- Q. A tornado with wind speeds of 300 miles per hour would be considered what class tornado?  
A. F-5 THES 11
- Q. What do the letters C P R stand for?  
A. Cardiopulmonary Resuscitation (pronounced CAR-DEE-O-PULL-MON-AIR-EE REE-SUS-UH-TAY-SHUN) THES 10
- Q. What is the grain from which flour is made?  
A. Wheat THES 5.
- Q. What is the term for something which can be seen through clearly, like glass?  
A. Transparent VA 2.1
- Q. What state university in Tennessee changed its name in 1994?  
A. University of Memphis from Memphis State University LSED
- Q. What type of painting is the hardest to clean-up?  
A. Oil Painting VA 1.2
- Q. What is the proper name for deer meat?  
A. Venison THES 5.
- Q. Which class of fire occurs in electrical wiring and electronic equipment?  
A. Class "C" fire THES 10

- Q. What are the building blocks of protein?  
A. Amino Acids THES 5.
- Q. Your body turns extra protein into what?  
A. Fat THES 5.
- Q. What scale is used to classify a tornado?  
A. Fujita Scale (pronounced FEW GEE TA) THES 11
- Q. What type drug speeds up the central nervous system?  
A. Stimulant THES 13
- Q. What is an unplanned event that usually results in an injury or damage?  
A. Accident THES 10
- Q. What group of diseases is characterized by uncontrolled growth and spread of abnormal cells?  
A. Cancer THES 9.
- Q. What percent of traffic accidents are alcohol related?  
A. 60 percent THES 13
- Q. What bugs spread Rocky Mountain Spotted Fever and Lyme Disease?  
A. Ticks THES 9.
- Q. When sewing what is worn on the middle finger of your sewing hand to push the needle through the fabric?  
A. Thimble VA 1.1
- Q. What kind of camera lens can bring your subject closer to you?  
A. Telephoto VA 1.1
- Q. What food group do dry beans fit into?  
A. Meat group THES 5.
- Q. In canning, what is the space left at the top of the container called?  
A. Head Space THES 5.
- Q. In sewing, what is the guide or directions for making a specific garment called?  
A. Pattern VA 2.3
- Q. Tusculum College, Tennessee's oldest college, is how much older than the University of Tennessee?  
A. One Day! (Tusculum founded on Sept. 9, 1794 and the University of Tennessee on Sept. 10, 1794) LSED
- Q. Dietary guidelines recommend that persons obtain at least what percent of their daily calories from carbohydrates?  
A. 50 THES 5.

- Q. Where does Tennessee rank in the nation for childhood obesity?  
A. Fifth (5th) Highest! THES 9.
- Q. What is the safest method to defrost frozen foods?  
A. In the refrigerator THES 5.
- Q. This part of the UT System does not have any undergraduate students but houses the UT School of Medicine and Dentistry?  
A. The University of Tennessee at Memphis LSED
- Q. What began in 1775, when the French Government offered a prize for a new method of preserving foods?  
A. Canning THES 5.
- Q. What is a chemical compound essential to good nutrition and bone structure?  
A. Mineral THES 5.
- Q. What is a picture that is woven in cloth and hung on a wall?  
A. Tapestry (pronounced TAP-ISS-TREE) VA 1.3
- Q. What was the first of the "normal" schools to enroll students?  
A. Middle Tennessee Normal School LSED
- Q. What Tennessee city is the home of UTC?  
A. Chattanooga (University of Tennessee at Chattanooga) LSED
- Q. What type of drug produces sleep or stupor while at the same time relieving pain?  
A. Narcotics THES 13
- Q. By law, a beverage that is called a "fruit juice" must contain at least what percent of natural fruit juices?  
A. 10 THES 5.
- Q. Which school in the University of Tennessee is located in East Tennessee?  
A. The University of Tennessee at Knoxville LSED
- Q. What is the type of knitting done with a long hooked needle?  
A. Crochet VA 1.2
- Q. How long does it take the sound of thunder to travel a mile?  
A. 5 seconds THES 11
- Q. What are proteins in food which aid in the maturing of food?  
A. Enzymes THES 5.
- Q. In food safety, what is the Danger Zone?  
A. Temperatures between 40 and 140 degrees Fahrenheit (where bacteria multiply fastest) THES 5.
- Q. Panning, F-Stop, and Depth of Field are terms found in which art form?  
A. Photography VA 1.2

- Q. What do azalea, iris, and holly have in common? THES 11  
A. They are common house plants which are poisonous
- Q. What is the unit by which food energy is measured? THES 5.  
A. Calorie
- Q. What is the material called that gives fabric body and shaping? VA 2.3  
A. Interfacing
- Q. What is the term used to describe two images taken at different times appearing on the same photograph? VA 1.3  
A. Double exposure
- Q. What is a combination of colors that lie next to each other on the color wheel called? VA 2.1  
A. Analogous or Related (UH-NAL-UH-GUS)
- Q. What is the term for predicting what the weather will do? THES 11  
A. Forecasting
- Q. What is the name of an object made by hand from your own idea, skill and method? VA 1.3  
A. Craft
- Q. What are the two readings given in a blood pressure? THES 9.  
A. Systolic (pronounced SISS-TAH-LIC) and Diastolic (pronounced DIE-ISS-TAH-LIC)
- Q. What is skim milk? THES 5.  
A. Whole milk with the fat or cream removed
- Q. What state university was first named Hall-Moody Institute? LSED  
A. University of Tennessee at Martin (would accept simply UT-Martin)
- Q. What is the term for the exceptionally high tides which accompany hurricanes causing much damage? THES 11  
A. Storm Surge
- Q. In what direction do Tornados generally travel? THES 11  
A. Northeast
- Q. What current university was at one time known as Tennessee A & I State Normal College? LSED  
A. Tennessee State University
- Q. What color is defined as a pale or light purple? VA 2.1  
A. Lavender or Lilac
- Q. What is the term for the exposing of a liquid to high temperatures allowing for the destruction of harmful organisms without major chemical changes to the substance? THES 5.  
A. Pasteurization (pronounced PASS-TER-UH-ZAY-SHUN)
- Q. What type nutrient in food provides energy to the body? THES 5.  
A. Carbohydrates

- Q. What insect is spreading the West Nile Virus in this country? THES 9.  
A. Mosquito
- Q. Which school in the University of Tennessee system is located in Southeast Tennessee? LSED  
A. The University of Tennessee at Chattanooga
- Q. What is the woven edge on either side of a piece of fabric? VA 2.3  
A. Selvage
- Q. What is the term for the removal of water from food? THES 5.  
A. Dehydrated
- Q. What is the tool with a sharp point and a small blade that is used to remove stitches from fabric? VA 1.1  
A. Seam Ripper
- Q. Carbohydrates provide how many calories per gram. THES 5.  
A. 4
- Q. What national organization issues weather watches and warnings? THES 11  
A. The National Weather Service
- Q. What is the term used to describe the weaving together of three or more cords, wires or string? VA 1.3  
A. Braid
- Q. U. T. was officially named the University of Tennessee in 1879. What was its' name immediately prior to this change? LSED  
A. East Tennessee University
- Q. Name the only state university in Tennessee named for a former governor? LSED  
A. Austin Peay State University
- Q. What is the meat from young dairy and beef calves? THES 5.  
A. Veal
- Q. What type of drug is alcohol? THES 13  
A. Depressant
- Q. What type camera lens allows you to frame more area from right to left? VA 1.1  
A. Wide-angle lens
- Q. What is a "PFD" as it relates to safety? THES 10  
A. A Personal Flotation Device
- Q. What happened to the University of Tennessee at Nashville? LSED  
A. It is now part of Tennessee State University
- Q. What part of the basement would be the safest place to be during a tornado? THES 11  
A. Southwest corner (The Northeast corner may pile up with debris)

- Q. What is made by putting many motifs together? VA 2.3  
A. Pattern
- Q. When mowing on slopes with a push mower, in which direction should you mow? THES 10  
A. Across the slope
- Q. What is the term for getting all of your subject in the photograph? VA 2.3  
A. Framing your subject
- Q. What is a list of dishes or foods served at a meal? THES 5.  
A. Menu
- Q. What is the term for the main object you want in your photograph? VA 2.3  
A. Subject
- Q. What is a substance that prevents bacterial growth called? THES 9.  
A. Antibiotic
- Q. What is a drug which can only be purchased with a physician's order? THES 13  
A. Prescription Drugs
- Q. What is the leading cause of infant deaths in Tennessee? THES 9.  
A. Low birth weight
- Q. At what temperature should cold foods be stored? THES 5.  
A. 40° F or colder
- Q. Which class of fire involves flammable liquids, gases, oil and grease? THES 10  
A. Class "B" fire
- Q. In what town is East Tennessee State University located? LSED  
A. Johnson City
- Q. What grain is pasta made from? THES 5.  
A. Wheat
- Q. What is the statement issued when a Tornado has been spotted? THES 11  
A. Tornado Warning
- Q. What is the term for introducing an undesirable element? THES 5.  
A. Contamination
- Q. What type of accident causes the most deaths in the United States? THES 10  
A. Motor Vehicles
- Q. As it relates to clothing, why do we use pinking shears? VA 1.1  
A. Cutting zig-zag edges on cloth to prevent fraying

- Q. What is the recommended amount of exercise time a child or teenager should get daily?  
A. 60 minutes (revised with 2005 new Food Guide Pyramid) THES 4.
- Q. Why should a person warm up their muscles with stretching exercises?  
A. Cold muscles are more prone to injuries THES 4.
- Q. The color teal is defined as what?  
A. Dark greenish blue VA 2.1
- Q. What can be defined as a style that gains sudden popularity and declines quickly?  
A. Fad THES 13
- Q. What is the device in a camera that opens and closes causing the film to be exposed forming an image?  
A. Shutter VA 1.1
- Q. What is the standard number for information?  
A. 411 or 1411 THES 11
- Q. What is the photographic term for taking a picture with no flash?  
A. Existing light photography VA 2.3
- Q. Oranges, lemons, and tangerines are what kind of fruits?  
A. Citrus Fruits THES 5.
- Q. What university in Tennessee was originally known as Grant University?  
A. UT Chattanooga LSED
- Q. What state university was at one time known as "T P I"?  
A. Tennessee Tech University LSED
- Q. What is the term for something that cannot be seen through?  
A. Opaque VA 2.1
- Q. In sewing, what is pivoting?  
A. Turning a corner VA 2.1
- Q. What is the phone number for the Tennessee Poison Control Center?  
A. 1-800-222-1222 or 1-423-222-1222 THES 11
- Q. Which school in the University of Tennessee system is located in West Tennessee?  
A. The University of Tennessee at Martin LSED
- Q. What natural occurrence kills the most people in the United States?  
A. Lightning THES 11
- Q. If you add black to a color to make it darker, you are changing the color's what?  
A. Shade VA 2.1

- Q. Foods high in soluble fiber can lower what substance in your blood? THES 5.  
A. Cholesterol
- Q. What is the statement issued when conditions are favorable for a Tornado to occur? THES 11  
A. Tornado Watch
- Q. What vitamin helps your body utilize calcium better? THES 5.  
A. Vitamin D
- Q. In emergency preparedness, what do we call the circular diagram containing the words: Prepare, Respond, Recover, Mitigate? THES 11  
A. The Disaster Cycle
- Q. What should be dialed in case of emergency? THES 11  
A. 911
- Q. What type of fat is liquid at room temperature? THES 5.  
A. Unsaturated
- Q. How are ingredients on a food label listed by nutritional importance? THES 5.  
A. From most to least
- Q. What university in Tennessee was originally known as Dixie College? LSED  
A. Tennessee Tech University
- Q. Sewing items needed to finish a project such as buttons, zippers, thread and snaps are also known as what? VA 1.1  
A. Notions
- Q. What class tornado would have winds of 100 miles per hour? THES 11  
A. F-1
- Q. What is the term for a disease that is transmitted to humans by food? THES 5.  
A. Foodborne Illness
- Q. What can be added to fruit to prevent it from browning in the freezer? THES 5.  
A. Ascorbic Acid (pronounced AS-SCORE-BIC)
- Q. At what wind speed does a tropical storm become a hurricane? THES 11  
A. Above 74 mph
- Q. Where is the University of Tennessee Space Institute located? LSED  
A. Tullahoma
- Q. What is the term for the way a surface feels when touched? VA 2.1  
A. Texture
- Q. Americans get most of their sodium intake from what ingredient added to foods during processing? THES 5.  
A. Salt

- Q. If you add white to a color, you change the color's what? VA 2.1  
A. Tint
- Q. A drug or other substance which produces delusions is called a what? THES 13  
A. Hallucinogen (pronounced HUH-LOOSE-UN-UH-GIN)
- Q. What is the cancer causing radioactive gas that can seep into your home from underground? THES 9.  
A. Radon
- Q. What is the name of an art work made by gluing different things down on a flat surface? VA 2.3  
A. Collage
- Q. When studying colors, what are colors called that contain blue? VA 2.1  
A. Cool Colors
- Q. What radar system has greatly improved the forecasting of tornados? THES 11  
A. Doppler
- Q. What is the most preventable cause of death in our society? THES 13  
A. Smoking
- Q. What is the addictive agent found in Tobacco? THES 13  
A. Nicotine
- Q. What is the recommended amount of time for proper handwashing? THES 2.  
A. 20 seconds
- Q. What Nashville university is located on the grounds of the former home of Adelia Acklen?  
(Pronounced ADD-UH-LEE-SH-UH ACK-LYNN) LSED  
A. Belmont
- Q. What is the term for adding a desirable substance to a food increasing the food value? THES 5.  
A. Fortified
- Q. Which state university traces its origins to Blount College founded in 1794? LSED  
A. The University of Tennessee
- Q. What 3 pieces of equipment make up the work triangle in the kitchen? THES 5.  
A. Stove, Sink, Refrigerator
- Q. Which boat has the right of way...a motor boat or a sail boat? THES 10  
A. The sail boat
- Q. Which tornado would be more dangerous an F-1 or an F-5? THES 11  
A. F-5
- Q. What Tennessee university is located near Sewanee, Tennessee? LSED  
A. The University of the South

- Q. What is the term for using parts of things to make a shape, form, or pattern rather than making it look real? VA 1.3  
A. Abstract
- Q. In what town is Tennessee Tech University located? LSED  
A. Cookeville
- Q. Which type of cancer kills the most people in the United States? THES 9.  
A. Lung Cancer
- Q. What is the term used for when a liquid becomes a soft semi-solid mass? THES 5.  
A. Coagulate
- Q. What kind of paint is made of powder mixed with glue and water? VA 1.2  
A. Tempera
- Q. What is the normal resting heart rate (heart beats per minute)? THES 4.  
A. 60 to 90
- Q. What nutrient helps keep the body temperature at a normal level? THES 5.  
A. Water
- Q. What is the most common stitch on a sewing machine? VA 2.1  
A. Straight Stitch
- Q. What is the term for the outer edges of a flat surface? VA 2.1  
A. Shape
- Q. What is the type of craft where you paint on a wooden surface? VA 1.3  
A. Tole Painting
- Q. What is the term for the drying out of frozen food that has been improperly packaged? THES 5.  
A. Freezer Burn
- Q. What is the first thing you should do upon arriving on the scene of an accident? THES 11  
A. Secure the scene or make sure the danger is removed or corrected
- Q. At what temperature should your refrigerator be set? THES 5.  
A. Between 32 degrees and 40 degrees Fahrenheit
- Q. What does the term linear mean? VA 2.1  
A. Consisting of lines
- Q. What harmful substance is in the paint of most houses built before 1960? THES 10  
A. Lead
- Q. What does the term motif mean? VA 2.1  
A. A single design unit which can be repeated

- Q. What was the original name of East Tennessee State University?  
A. East Tennessee State Normal School LSED
- Q. What single food item contributes the most dietary fat to the American diet?  
A. Hamburger THES 5.
- Q. What vitamin is called the “Sunshine” vitamin?  
A. Vitamin C (because citrus fruits are a good source of Vitamin C) (also will accept Vitamin D because the body produces Vitamin D when sunlight is absorbed by the skin) THES 5.
- Q. What is the nutrient needed to prevent anemia?  
A. Iron THES 5.
- Q. What disease did Jonas Salk eradicate with his vaccine?  
A. Polio THES 9.
- Q. What state university was first named West Tennessee State Normal School?  
A. University of Memphis LSED
- Q. To prevent concussions when cycling, what piece of equipment should you wear?  
A. Helmet THES 10
- Q. What is the name for vitamin B1?  
A. Thiamin (pronounced THY UH MUN) THES 5.
- Q. What is the term for the passing of nutrients into the blood stream?  
A. Absorption THES 5.
- Q. What is the largest voluntary health organization in the world?  
A. American Cancer Society THES 9.
- Q. What type drug can be bought without a physician's order?  
A. Over-the-Counter Drug THES 13
- Q. Name the two types of dietary fiber?  
A. Soluble and Insoluble THES 5.
- Q. What is the term for the reduction in the size of particles suspended in a liquid by the use of high pressure?  
A. Homogenization (pronounced HUM-AH-GIN-UH-ZAY-SHUN) THES 5.
- Q. What does the term rancid mean?  
A. Offensive smell (It STINKS!) THES 5.
- Q. In what town is Middle Tennessee State University located?  
A. Murfreesboro LSED
- Q. How many teaspoons of sugar does a typical 12 ounce can of carbonated soft drink contain?  
A. 10 THES 5.

- Q. What does the size of the lens opening of a camera effect?  
A. Depth of field in focus VA 1.1
- Q. What is the most important tool you have to prevent foodborne illness?  
A. Good personal hygiene THES 2.
- Q. Emergency responders pay close attention to NOAA weather radio reports in preparing for emergencies. What does NOAA stand for?  
A. the National Oceanic and Atmospheric Administration THES 11
- Q. Concerning interior design, what is the meaning of the word emphasis?  
A. Center of interest VA 2.3
- Q. At what time of the day do most lightning deaths occur?  
A. Afternoon THES 11
- Q. What is the nutrient of food needed to build and repair body tissues?  
A. Protein THES 5.
- Q. What is the part of the scene that appears behind the subject in a photograph?  
A. Background VA 2.1
- Q. What state university was at one time University of Tennessee Junior College?  
A. University of Tennessee at Martin (would accept simply UT-Martin) LSED
- Q. What is defined as a substance that, when put into your body, can alter the way your body works?  
A. Drugs THES 13
- Q. What term refers to the brightness or dullness of a color?  
A. Intensity VA 2.3
- Q. What is the light proof area used for processing film?  
A. Darkroom VA 1.1
- Q. What method of cooking comes from the French word meaning "to jump" and is usually done to onions and mushrooms?  
A. Saute (pronounced SAW-TAY) THES 5.
- Q. What is used in sewing to give shape to a garment by rounding flat fabric to fit curves?  
A. Darts VA 1.3
- Q. What nutrient builds bones and teeth?  
A. Calcium THES 5.
- Q. What is the first responsibility of any baby sitter?  
A. Safety of the child THES 10
- Q. Jogging would be considered what type of exercise?  
A. Aerobic Exercise THES 4.

- Q. In terms of shape what is the difference in plant cells and animal cells?  
A. Plant Cells are rectangular Animal cells are round 7.LS1.1
- Q. What a term for the genetic material of a given organism?  
A. Genome (GEE-NOAM) 7.LS3.2
- Q. In terms of shape what is the difference in plant cells and animal cells?  
A. Plant Cells are rectangular Animal cells are round 7.LS1.3
- Q. Which two gasses make up the greatest percentage of the atmosphere of the Earth?  
A. Oxygen and Nitrogen 7.ESS3.1
- Q. What are tiny cell structures that carry out specific functions within the cell?  
A. Organelles 7.LS1.1
- Q. What structure is responsible for coordinating growth, metabolism, and the reproduction of the cell?  
A. The nucleus 7.LS1.3
- Q. What is the network of canals within the cell use to transport and store substances?  
A. Endoplasmic Reticulum (Pronounced IN-DOE-PLAS-MICK REE-TICK-U-LUM) 7.LS1.1
- Q. Digesting food would be an example of what kind of change?  
A. Chemical Change 7.PS1.5
- Q. An organism whose cells have a cell nucleus and other organelles enclosed in membranes would be classified as what?  
A. Eukaryote (pronounced U-CARRY-OAT) 7.LS1.7
- Q. Which type of cell would have cilia?  
A. Animal Cells 7.LS1.1
- Q. The rusting of iron would be an example of what kind of change?  
A. Chemical Change 7.PS1.5
- Q. What is the threadlike structure of nucleic acids found in the nucleus of the cell which carries genetic information?  
A. Chromosome (Pronounced K-ROAM-UH-SOAM) 7.LS3.2
- Q. From a chemical standpoint how would you classify the substance NaCl (N-A-C-L)?  
A. A compound 7.PS1.5
- Q. What structure in the cell is responsible for storing the cells DNA?  
A. The nucleus 7.LS1.1
- Q. What organelle within the cell is responsible for photosynthesis?  
A. Chloroplasts 7.LS1.1
- Q. Chemically speaking table salt would be classified as a what?  
A. A Compound 7.PS1.3

- Q. Which two gasses make up the greatest percentage of the atmosphere of the Earth?  
A. Oxygen and Nitrogen 7.ESS3.1
- Q. From a chemical standpoint how would you classify the substance CO<sub>2</sub> (C-O-2)?  
A. A compound 7.PS1.5
- Q. What structure is responsible for the support and protection of the animal cell?  
A. Cell membrane 7.LS1.3
- Q. What type cell has a cell wall?  
A. Plant Cell 7.LS1.3
- Q. If the reactants have a mass 5 grams before a Chemical reaction, what would you expect the product's mass to be?  
A. 5 grams also 7.PS1.4
- Q. The element Hydrogen is designated on the Periodic Table (PEER-E-ODD-TICK) as what?  
A. H 7.PS1.5
- Q. The element Potassium is designated on the Periodic Table (PEER-E-ODD-TICK) as what?  
A. K 7.PS1.5
- Q. Migration is an example of what kind of adaptation?  
A. Behavioral 7.LS1.6
- Q. What is the term for the water movement through plants?  
A. Transpiration (pronounced TRANS-PER-RAY-SHUN) 7.LS1.9
- Q. What is the universal solvent?  
A. Water 7.PS1.5
- Q. What are the three main structures of a cell?  
A. Membrane, nucleus, cytoplasm 7.LS1.3
- Q. What is the term for the number of protons found in the nucleus of an atom?  
A. The Atomic Number 7.PS1.5
- Q. The element Gold is designated on the Periodic Table (PEER-E-ODD-TICK) as what?  
A. Au 7.PS1.5
- Q. What is classified as an animal that is cold-blooded and breathes with gills in the water?  
A. A Fish 7.LS1.3
- Q. What is another term for having a variety of life in a given place?  
A. Biodiversity (BYO-DUH-VERSE-UH-TEE) 7.LS1.6
- Q. The element Iron is designated on the Periodic Table (PEER-E-ODD-TICK) as what?  
A. Fe 7.PS1.5

- Q. Which type of cell would have Lysosomes? 7.LS1.1  
A. Animal Cells
- Q. What are the three main structures of a cell? 7.LS1.1  
A. Membrane, nucleus, cytoplasm
- Q. What is a substance consisting of two or more atoms from different elements that can be separated by physical means? 7.PS1.3  
A. A Mixture
- Q. Within a period of the Periodic Table (PEER-E-ODD-TICK) what increases from left to right? 7.PS1.5  
A. The Atomic Number
- Q. What structure in the cell is responsible for storing the cell's DNA? 7.LS1.3  
A. The nucleus
- Q. Animals produce Carbon Dioxide during what process? 7.LS1.9  
A. Respiration
- Q. What are the fundamental particles which make up matter? 7.PS1.1  
A. Atoms
- Q. What is a trait which allows an organism to survive and reproduce in its environment? 7.LS1.6  
A. Adaptation (ADAP-TAY-SHUN)
- Q. Animals basically breathe in what and exhale what? 7.LS1.9  
A. Breathe in Oxygen and exhale Carbon Dioxide
- Q. A difference between members of the same population is a what? 7.LS1.6  
A. Variation
- Q. A single celled organism lacking a membrane-bound nucleus or organelles would be classified as a what? 7.LS1.7  
A. Prokaryote (pronounced PRO-CARRY-OAT)
- Q. Binary fission is an example of what type of reproduction? 7.LS1.7  
A. Asexual Reproduction
- Q. Zebras herding together to protect the herd is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Behavioral Adaptation
- Q. What is a substance which has properties different than its components? 7.PS1.3  
A. A Compound
- Q. What is the jellylike fluid inside the cell in which the organelles are suspended? 7.LS1.1  
A. Cytoplasm

- Q. Vultures having a bald head and a good sense of smell is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Structural Adaptation
- Q. Elements arranged in a row on the Periodic Table (PEER-E-ODD-TICK) are called what? 7.PS1.5  
A. Periods
- Q. Female birds having colors that blend in more with their surroundings is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Structural Adaptation
- Q. What is a diagram that can be used to determine the probability of an offspring having a particular genotype? 7.LS3.2  
A. Punnet Square (Pronounced PUN-ET)
- Q. What is classified as an animal that is cold-blooded is able to live in both water and on land? 7.LS1.3  
A. Amphibian
- Q. Toads having long sticky tongues is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Structural Adaptation
- Q. What organelle within the cell produces proteins? 7.LS1.1  
A. Ribosomes (Pronounced RIBE-O-SOAMS)
- Q. Related to the Periodic Table (PEER-E-ODD-TICK) how are elements which have no metallic properties classified? 7.PS1.5  
A. Nonmetals
- Q. Burning wood would be an example of what kind of change? 7.PS1.5  
A. Chemical Change
- Q. Elements that are similar would be found where in the Periodic Table (PEER-E-ODD-TICK)? 7.PS1.5  
A. In the same column
- Q. What are the building blocks of all life? 7.LS1.1  
A. Cells
- Q. A cheetah having long legs and a light build is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Structural Adaptation
- Q. Melting and ice cube would be an example of what kind of change? 7.PS1.5  
A. Physical Change
- Q. What is the study of Heredity called? 7.LS3.2  
A. Genetics
- Q. From a chemical standpoint how would you classify the substance H<sub>2</sub>O (H-2-0-)? 7.PS1.5  
A. A compound

- Q. Fragmentation (Pronounced Frag-MENT-TAY-SHUN) is an example of what type of reproduction? 7.LS1.7  
A. Asexual Reproduction
- Q. What organelle within the cell is considered the brain of the cell? 7.LS1.1  
A. Nucleus
- Q. Balling up a sheet of aluminum foil would be an example of what kind of change? 7.PS1.5  
A. Physical Change
- Q. What is the term for when a parent cell forms a bubble-like bud that when fully developed breaks away and forms a new organism? 7.LS1.7  
A. Budding
- Q. The total amount of matter found in an atom is designated as that atom's what? 7.PS1.5  
A. Atomic Mass
- Q. What type of reproduction produces offspring identical to one parent? 7.LS1.7  
A. Asexual Reproduction
- Q. What structure is responsible for the support and protection of the plant cell? 7.LS1.1  
A. Cell wall
- Q. What are the basic substances which make up the Periodic Table (PEER-E-ODD-TICK)? 7.PS1.5  
A. Elements
- Q. Which type of reproduction would produce an offspring that is genetically unique? 7.LS1.7  
A. Sexual Reproduction
- Q. What is the term for when a parent organism breaks into pieces and each piece becomes a new organism? 7.LS1.7  
A. Fragmentation (Pronounced Frag-MENT-TAY-SHUN)
- Q. The toxicity and the flammability of a substance would be examples of what property? 7.PS1.5  
A. Chemical Property
- Q. Elements arranged in a column on the Periodic Table (PEER-E-ODD-TICK) are called what? 7.PS1.5  
A. Groups
- Q. The element Carbon is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5  
A. C
- Q. What is classified as an animal that is cold-blooded and is covered with scales? 7.LS1.3  
A. A Reptile
- Q. The element Chlorine is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5  
A. Cl
- Q. From a chemical standpoint how would you classify the substance Fe (F-E)? 7.PS1.5  
A. An element

- Q. Atoms will react chemically in the same way if they are in the same what? 7.PS1.5  
A. The same group or family
- Q. Plants basically breathe in what and exhale what? 7.LS1.9  
A. Breathe in Carbon Dioxide and exhale Oxygen
- Q. The element Oxygen is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5  
A. O
- Q. The element Nitrogen is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5  
A. N
- Q. A opossum playing dead is an example of what kind of adaptation? 7.LS1.6  
A. Behavioral
- Q. Why is Helium a safer substance to use in a Blimp than Hydrogen? 7.PS1.5  
A. It is less Reactive (therefore less flammable)
- Q. What is a zygote? (Pronounced ZI-GOAT) 7.LS3.2  
A. A fertilized egg
- Q. Chemically speaking soil would be classified as a what? 7.PS1.3  
A. A Mixture
- Q. What is a genotype? (pronounced JEAN-O-TYPE) 7.LS3.2  
A. The genetic makeup of an organism?
- Q. Chemically speaking water would be classified as a what? 7.PS1.3  
A. A Compound
- Q. What is classified as an animal that has hair and gives birth to their young and feeds them milk? 7.LS1.3  
A. A mammal
- Q. Which type of cell would have one large central vacuole? (Pronounced VACK -U- UL) 7.LS1.3  
A. Plant Cells
- Q. A warm-blooded animal that lives in water and breathes with lungs would be classified as a what? 7.LS1.3  
A. A mammal
- Q. An actual change in the physical make-up of an organism to aid in survival is what kind of adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Structural Adaptation
- Q. The scientific law that basically states that mass can neither be created or destroyed is known as what? 7.PS1.4  
A. Law of Conservation of Mass
- Q. What is a cellular structure in an animal cell that helps organize cell division? 7.LS1.1  
A. Centriole

- Q. What is a phenotype? (pronounced FEAN-O-TYPE) 7.LS3.2  
A. An animals physical characteristics
- Q. What type of reproduction will combine the gentic material of two parents? 7.LS1.7  
A. Sexual Reproduction
- Q. What is the term for when a parent cell splits into two identical offspring cells? 7.LS1.7  
A. Binary Fission
- Q. What regulates passage of materials in and out of the the cell nucleus? 7.LS1.1  
A. Nuclear Membrane
- Q. A Black Bear hibernating in the winter is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Behavioral Adaptation
- Q. What is appromimately equal to the number of protons and neutrons found in an atom? 7.PS1.5  
A. Atomic Mass
- Q. What structure is responsible for coordinating growth, metabolism, and the reproduction of the cell? 7.LS1.1  
A. The nucleus
- Q. What organelle within the cell stores water and other materials? 7.LS1.1  
A. The Vacuole (Pronounced Vack-U-ULL)
- Q. What is classified as an animal that has a head, a thorax, and abdomen? 7.LS1.3  
A. An Insect
- Q. Plants produce oxygen during what process? 7.LS1.9  
A. Photosynthesis
- Q. What structure is responsible for the support and protection of the plant cell? 7.LS1.3  
A. Cell wall
- Q. What organelle within the cell contains the DNA? 7.LS1.1  
A. Nucleus
- Q. What is termed as a specific physical characteristic which varies from one individual to another? 7.LS3.2  
A. A trait
- Q. What organelle within the cell provides energy for celluar respiration? 7.LS1.1  
A. Mitochondria (Pronounced MITE-UH-CON-DREE-UH)
- Q. Which type of cell would have one large central vacuole? (Pronounced VACK -U- UL) 7.LS1.1  
A. Plant Cells
- Q. What are the building blocks of all life? 7.LS1.3  
A. Cells

- Q. The element Sodium is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5  
A. Na
- Q. What organelle within the cell breaks down food molecules and dead or injured cells? 7.LS1.1  
A. Lysosome (Pronounced LIE-SO-SOAM)
- Q. What is the cell wall of a plant composed of? 7.LS1.1  
A. Cellulose
- Q. What organelle within the cell is know as the powerhouse of the cell? 7.LS1.1  
A. Mitochondria (Pronounced MITE-UH-CON-DREE-UH)
- Q. What is a substance required to start a chemical reaction? 7.PS1.4  
A. Reactant
- Q. Chemically speaking baking soda would be classified as a what? 7.PS1.3  
A. A Compound
- Q. What is the change which affects the size, shape, or color of a substance but does not affect its composition? 7.PS1.5  
A. A Physical Change
- Q. What structure is responsible for the support and protection of the animal cell? 7.LS1.1  
A. Cell membrane
- Q. A group of animals that are more like each other than they are alike any other group of animals are called what? 7.LS1.3  
A. A species
- Q. What is a variant form of a given gene? 7.LS3.2  
A. An Allele (UH-LEAL)
- Q. Which type of cell would have cilia? 7.LS1.3  
A. Animal Cells
- Q. Chemically speaking a peanut butter and jelly sandwich would be classified as a what? 7.PS1.3  
A. A Mixture
- Q. What is a substance consisting of two or more atoms from different elements bound together chemically? 7.PS1.3  
A. A Compound
- Q. An action taken by the organism to aid in survival is what kind of adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Behavioral Adaptation
- Q. What is a one or two letter notation used to represent an atom of a particular element? 7.PS1.5  
A. Chemical Symbol

- Q. Shredding paper would be an example of what kind of change? 7.PS1.5  
A. Physical Change
- Q. What are gases which are odorless, colorless and react very little with other elements? 7.PS1.5  
A. Noble Gases
- Q. Chemically speaking air would be classified as a what? 7.PS1.3  
A. A Mixture
- Q. The color or texture of a substance would be examples of what property? 7.PS1.5  
A. Physical Property
- Q. What is a substance that is produced from a chemical reaction? 7.PS1.4  
A. Product
- Q. What type cell has a cell wall? 7.LS1.1  
A. Plant Cell
- Q. Candian Geese flying south in the winter is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6  
A. Behavioral Adaptation
- Q. What is the cell wall of a plant composed of? 7.LS1.3  
A. Cellulose
- Q. Which type of cell would have Lysomes? 7.LS1.3  
A. Animal Cells
- Q. What is the table which arranges the chemical elements into groups and properties? 7.PS1.5  
A. The Periodic Table (PEER-E-ODD-TICK)
- Q. A section of DNA which codes a specific trait is know as what? 7.LS3.2  
A. A Gene
- Q. What is the basic unit of all living things? 7.LS1.1  
A. Cells
