

## This Season's Coolest Looks

## CAMOUFLAGE!

What you can't fix, you can hide. Consider these strategic distractions:

1. This multistrand peridot and olivine necklace from Sequin drapes around your neck, covering any spots with light, lovely layers.
2. To mask a midriff bulge, some women opt for boxy tops—but a streamlined shape is more youthful and suprisingly flattering.
3. Advice from Eliza Petrescu, the guru of eyebrows: If yours are graying or thinning, you can create instant definition with the right colored pencil. Her tip: Don't use it like a crayon. Keep your strokes feathery, and blend with your finger.
