All 2008 Outcomes (entire year)

7 beef producers added feeding rings and improved hay feeding methods to reduce wastage/spoilage.

5 beef producers constructed hay storage structures.

0 beef producers constructed 0 hay storage structures holding 0 bales saving \$0.

6 beef producers forage tested and had rations balanced based upon results of forage tests.

9 beef producers have improved knowledge about best management practices to protect and improve water quality.

10 beef producers have improved knowledge about efficient hay feeding, including use of hay rings and managed hay feeding.

0 beef producers have improved knowledge about planning and building hay storage structures.

9 beef producers have improved knowledge about production and economic benefits of forage

testing and ration balancing.

10 beef producers have improved knowledge about record keeping.

14 beef producers have improved knowledge of a broad array of beef knowledge by participating in Master Beef Producer.

0 beef producers have improved knowledge of economic returns from improved pasture management (weed control, fertilization, renovation with clovers, stockpiling fescue, establishing native warm season grasses).

22 beef producers report implementing practices learned by participation in Master Beef Program.

12 beef producers report improved returns due to adding hay storage structures, utilizing forage testing and improved hay feeding management.

22 beef producers report improved returns to their operation due to implementing practices learned by participation in Master Beef Producer program.

16 beef producers report improved returns due to utilizing soil testing, warm season grasses, renovation with clovers, stockpiling and/or native warm season grasses.

0 beef producers submitted 0 forage samples and had rations balanced, thus increasing returns by \$0.

0 beef producers utilized hay feeding rings to feed 0 bales and improved feeding methods to reduce wastage/spoilage, saving \$0.

16 beef producers utilizing soil testing, warm-season grasses, renovation with clovers, stockpiling and/or native warm season grasses to improve production efficiency.

0 of 0 participants use recommended hay storage methods to reduce hay dry matter losses on 0 round bales of grass hay, saving \$ 0 this year.
