

FOOD WORKS

Key Messages

1. Food labels can help you make healthy food choices.
2. When you eat healthy foods, you:
 - feel better
 - have more fun
 - play better at sports
 - learn better
3. By reading a label, you can:
 - tell what you are actually buying
 - compare foods to see which is better for you

Food Labels

- Food labels tell you a lot about food. They don't tell you what to eat. That's your decision.
- You make a lot of decisions each day. One of the most important decisions you make is what you eat.
- Food labels can give you a lot of information about the food. They will tell you how much fat or sugar is in the food.
- The label tells you what ingredients are in the food and the "Nutrition Facts" part of the label tells you how nutritious the food is. You can compare nutrition information on similar foods and pick the most nutritious one.

Amount Per Serving

Make Your Own Food Label

Cottage Cheese Cinnamon Toast

4 slices whole-grain bread
1 cup low-fat cottage cheese
cinnamon

Toast bread. Spread ¼ cup cottage cheese on toast. Sprinkle lightly with cinnamon. If desired, place cottage cheese toast under broiler until cheese is warm.

Use a food label as an example and make a label for your product.

Lost Labels

The food products below have lost their labels. Can you match the food with the correct label? Place the label's letter next to the product it belongs to.

Bonus Question: Which products are the healthiest snack choices?

What is your favorite ready-to-eat cereal? Read the label.

Do you think it is a healthy choice?

Why?

Why not?
