

USDA Trade Retaliation Programs: Overview for Tennessee Producers

*Sarah Best, Graduate Research Assistant; S. Aaron Smith, Assistant Professor; and Andrew Muhammad, Professor and Blasingame Chair of Excellence
Department of Agricultural and Resource Economics*

Introduction

2018 has been a turbulent year for U.S. agricultural trade. In the spring/summer, the Trump administration imposed new tariffs (or increased tariffs) on several goods imported from multiple trading partners. The administration stated that imposing tariffs was “necessary to protect national security and the intellectual property of U.S. businesses” (Bryan 2018). The new tariffs imposed (or increased tariffs) by the U.S. resulted in many countries enacting retaliatory tariffs against U.S. goods — particularly agricultural commodities and products. China, Mexico, Canada and the European Union implemented retaliatory tariffs that have had a measurable impact on agricultural commodity prices, such as soybeans, pork, corn, dairy, sorghum, cotton, wheat, as well as nuts, vegetables, fruits and berries. As a response to the retaliatory tariffs, on July 24, the USDA announced a \$12 billion assistance package to farmers impacted by “unjust retaliation” ([USDA Press Release](#)). On August 27, the USDA announced details on three programs designed to partially mitigate the reduction in prices (and farm income) for several agricultural commodities impacted by retaliatory tariffs ([USDA Press Release](#)). This article explains how and why the \$12 billion in aid will be distributed.

Why is up to \$12 billion in aid being distributed to farmers?

New or increased tariffs have been enacted or proposed on many U.S. agricultural exports by several key trading partners. The tariffs are in retaliation to recently imposed U.S. tariffs on goods from China, Mexico, Canada and the European Union, as well as other importing countries. Sonny Perdue, the United States secretary of agriculture, said of the Chinese tariffs, “Unfortunately, America’s hard-working agricultural producers have been treated unfairly by China’s illegal trading practices and have taken a disproportionate hit when it comes to illegal retaliatory tariffs. USDA will not stand by while our hard-working agricultural producers bear the brunt of unfriendly tariffs enacted by foreign nations (USDA 2018).” As a result of retaliatory tariffs, the prices of many U.S. agricultural commodities have declined.

For example, soybeans, the largest by value, agricultural commodity exported to China, have experienced a decline in price of \$2.34 ¼ (CBOT harvest futures) — from a high of \$10.60 ½ on May 29, 2018, to a low of \$8.26 ¼ on July 16, 2018, which is a 22 percent decline in price. Other agricultural commodities such as corn, wheat, sorghum, cotton, hogs and dairy have also experienced price declines partially due to tariffs. **It is important to note that:** 1) Price declines for agricultural commodities are not solely due to the retaliatory tariffs and the negative impacts on exports and prices (for example, weather from May through August has provided good growing conditions leading to increased U.S. production [increased production results in a price decline, ceteris paribus]); and 2) The long-term impacts (i.e., loss of market share) on exports and prices for agricultural commodities are uncertain.

To compensate farmers, the USDA has announced \$12 billion in aid to offset the negative impacts retaliatory tariffs have had on exports, commodity prices, and producer income. USDA Secretary Sonny Perdue describes the relief program as a “...short-term solution to allow President Trump time to work on long-term trade deals to benefit agriculture and the entire U.S. economy” (USDA 2018). The program will help stabilize farm income for this production year; however, the program is not a long-term solution to low prices due to tariffs on agricultural commodities.

How do the retaliatory tariffs impact Tennessee farmers specifically?

China represents 18 percent of U.S. agricultural exports, and soybeans and coarse grains (including coarse grain products such as DDGS) are our top two agricultural exports to the country, while cotton, dairy and pork also rank in the top 10 (Jiang 2016). Additionally, soybeans are Tennessee’s highest-valued agricultural commodity with 1.72 million acres (2018 USDA estimate) of soybeans planted in the state and a production value of \$796 million (2017 estimate; Johnson 2018). China currently imports 57.3 percent of all U.S. soybean exports. China could replace some of the soybean imports from the U.S. by importing additional soybeans from Brazil (Muhammad and Smith 2018). In April 2018, Muhammad and Smith estimated that a 25 percent tariff increase on soybeans could result in a \$0.33 to \$1.76 per bushel loss and a total loss of \$4.5 billion to the U.S. soybean industry. Smith, Menard and English (2018) estimated the loss in Tennessee producer income due to retaliatory tariffs would be \$64 to \$88 million (with no trade mitigating payments) and would have a total economic impact (including direct and multiplier effects through the state’s economy) of \$120 to \$164 million and reduce Tennessee employment by 405 to 553 jobs.

While analysis of other Tennessee commodities that have been impacted has not been conducted, the announcement from the USDA indicating that direct aid will be provided to producers of soybeans, sorghum, corn, wheat, cotton, dairy and hogs (USDA 2018) signals that a significant impact could be felt by Tennessee producers of these seven commodities.

How is the \$12 billion being distributed?

The USDA will utilize three programs to assist American farmers affected by retaliatory tariffs. These programs are a Market Facilitation Program, Food Purchase and Distribution Program, and Trade Promotion Program, all of which will be implemented under the authority of the Commodity Credit Corporation (CCC) Charter Act (USDA 2018). The Trade Promotion Program will assist in developing new export markets for farm products and will be administered by both the CCC and the Foreign Agriculture Service (FAS) (USDA 2018). The Trade Promotion Program will likely not provide immediate help to producers (although the long-term benefits could be substantial). Details regarding the CCC and the other two programs to be administered jointly by the CCC and other USDA agencies (Farm Service Agency — FSA and Agricultural Marketing Service — AMS) are described in the following sections.

What is the Commodity Credit Corporation?

The CCC was created in 1933 to “stabilize, support, and protect farm income and prices” (Commodity Credit Corporation 2015), as well as to maintain and distribute balanced and adequate supplies of agricultural commodities in the United States. In 1948, the CCC was reincorporated within the USDA by the Commodity Credit Corporation Charter Act (Commodity Credit Corporation 2015). The CCC Charter Act is now authorized to assist agricultural producers through loans, purchases, payments and other operations (Commodity Credit Corporation 2015). Under Section 5 of the CCC Charter Act, the CCC is permitted to:

- Support agricultural commodity prices through loans, purchases, payments and other operations;
- Make available materials and facilities in connection with the production and marketing of agricultural products;
- Procure commodities for sale to other government agencies; foreign governments; and domestic, foreign or international relief or rehabilitation agencies and for domestic requirements;
- Remove and dispose of surplus agricultural commodities;
- Increase the domestic consumption of commodities by expanding markets or developing new and additional markets, marketing facilities, and uses for commodities;
- Export, or cause to be exported, or aid in the development of foreign markets for commodities; and
- Carry out authorized conservation or environmental programs (Stubbs 2018).

What is the Market Facilitation Program?

The Market Facilitation Program (MFP) is authorized under the CCC Charter Act and will provide payments incrementally to producers of soybeans, sorghum, corn, wheat, cotton, dairy and hogs. The support is intended to help farmers manage disrupted markets and deal with surplus commodities resulting from the impacts of retaliatory tariffs (USDA 2018). On August 27, 2018, the USDA released details of the MFP, which will begin accepting applications on September 4, 2018 and conclude January 15, 2019. Payments will first be issued on 50 percent of a farmer's production and a second payment rate may be announced near December 3, 2018 that applies to the other 50 percent of the farmer's production ([MFP 2018](#)). The MFP rates as announced by the USDA for the initial payments are:

- Cotton \$0.06 per pound
- Corn \$0.01 per bushel
- Dairy \$0.12 per cwt.
- Hogs \$8.00 per head (number of head as of August 1, 2018)
- Sorghum \$0.86 per bushel
- Soybeans \$1.65 per bushel
- Wheat \$0.14 per bushel ([MFP 2018](#))

For example, a soybean grower who harvested 100,000 bushels of soybeans would receive an initial payment of \$82,500 (100,000 bushels times 50 percent times \$1.65 per bushel). Estimated total MFP and per acre payments for crops in the U.S. and Tennessee are shown in Table 1. Significant variation in per acre payments between farms may exist due to differences in yield.

Table 1. Estimated Payments for Crops from the Market Facilitation Program

	Production*	Total Estimated Payments**	Estimated Average per acre Payment***
Tennessee			
Cotton	755,000 bales	\$10,872,000	\$31.51
Corn	127.020 million bu	\$635,100	\$0.87
Sorghum	NA	NA	NA
Soybeans	84.280 million bu	\$69,531,000	\$40.43
Wheat	18.585 million bu	\$1,300,950	\$4.41
U.S.			
Cotton	19.235 million bales	\$276,984,000	\$27.32
Corn	14.586 billion bu	\$72,932,425	\$0.89
Sorghum	375.385 million bu	\$161,415,550	\$30.50
Soybeans	4.586 billion bu	\$3,783,380,700	\$42.58
Wheat	1.877 billion bu	\$131,374,950	\$3.32

* Estimated based on August 10, 2018 USDA Crop Production report.

**Payments are subject to change based on changes in production, payment limitations, certified acres and sign up.

***Average per acre estimates will vary from farm to farm based on farm yields. Yields higher than the national or state average will result in greater payments; yields lower than the national or state average will result in lower payments.

How do I know if I'm eligible to receive payments from the Market Facilitation Program?

To be eligible for the program a farmer must:

- Be growing one of the seven aforementioned commodities;
- Be following highly erodible land conservation and wetland conservation provisions;
- Have an average adjusted gross income of less than \$900,000;
- Have a crop acreage report on file with the FSA for MFP crop commodities; and
- Be a person or legal entity who was actively engaged in farming in 2018.

Additionally, payments cannot exceed a combined \$125,000 for eligible crop commodities and a combined \$125,000 for dairy production and hogs. However, MFP payments don't count against other 2014 Farm Bill payment limitations (for example ARC or PLC payments) ([MFP 2018](#)). For crops, harvest must be 100 percent complete before application for MFP payments is made.

Applications for the program will be available online at farmers.gov/MFP. The applications can be completed at a local FSA office (the appendix provides FSA service center locations in Tennessee and their contact information) or submitted electronically by scanning, emailing or faxing FSA service centers ([MFP 2018](#)). Farmers may be asked to provide additional documents as required by the CCC to verify their production if current verifiable records are not available. Examples of these records could be "copies of receipts, ledgers of income, income statements of deposit slips, register tapes, invoices for custom harvesting, and records to verify production costs, contemporaneous measurements, truck scale tickets or contemporaneous diaries that are determined acceptable by the FSA county committee." ([MFP 2018](#))

According to farmers.gov, those who have not participated in USDA programs in the past will be asked to establish farm records and a farm tract number at the USDA FSA service center. To do this, farmers will need to bring proof of identity (such as a driver's license or Social Security card), a copy of recorded deed, survey plat, rental or lease agreement of the land, and articles of incorporation, estate or trust documents for entities. It is also recommended

that farmers bring verifiable and reliable production records by crop, type, practice, intended use and acres if they are not already on file with the FSA. Additionally, farmers may need to fill out or update forms CCC-941, AD-1026 and CCC-901 for their farm records, which include information regarding income, conservation plans, and members of a farm or ranch, respectively (farmers.gov 2018).

What is the Food Purchase and Distribution Program?

The Food Purchase and Distribution Program is authorized under the CCC Charter Act and implemented through the Agricultural Marketing Service (AMS) to purchase surplus supplies of various commodities (USDA 2018). AMS purchases domestically produced and processed commodity food products on a continual basis to encourage consumption of domestically produced foods. These foods are then delivered to schools, food banks and households across the country and comprise a necessary component of the nation's food safety net (AMS 2018a). These continual purchases are generally a part of Section 32 of the CCC Charter Act, which is to promote continued domestic consumption, as opposed to purchases under Section 5, which would be purchases made related to trade mitigation (AMS 2018b).

As of the publication of this article (August 28, 2018), purchase announcements in August included fluid milk, beef products, chicken products, catfish products and turkey products (AMS 2018c). However, the purchase announcement states that they are a part of the normal Section 32 purchases and are not related to any Section 5 purchases that would be due to issues with trade (AMS 2018b). Purchase announcements can be found at ams.usda.gov/selling-food/purchase-announcements with instructions for new vendors found in each announcement.

On August 27, 2018, the USDA announced a list of 31 commodities that will be eligible for purchases under Section 5. Total purchases through the Food and Distribution Program (under Section 5) are estimated to be \$1.414 billion. Additional details are available at: usda.gov/media/press-releases/2018/08/27/usda-announces-details-assistance-farmers-impacted-unjustified.

The Agricultural Trade Promotion Program

In August 2018, it was announced that \$200 million will be added to the Agricultural Trade Promotion Program (ATP) as part of the relief package to assist farmers affected by trade retaliation. The Foreign Agricultural Service (FAS) administers the ATP under authority of the CCC. The CCC will use its Charter Act authority for the program in conjunction with the private sector to assist in developing new export markets for U.S. farm products. The goal of the ATP is to assist U.S. agricultural exporters in identifying and accessing new markets and help mitigate the effects of tariff and non-tariff barriers in importing countries. The ATP will provide cost-share assistance to eligible U.S. organizations for activities such as consumer advertising, public relations, point-of-sale demonstrations, participation in trade fairs and exhibits, market research, and technical assistance. Applications for the ATP will be accepted until November 2, 2018, or until funding is exhausted. Funding should be allocated to eligible participants in early 2019. The ATP is meant to help all sectors of U.S. agriculture, including fish and forest product producers, mainly through partnerships with nonprofit national and regional organizations (usda.gov/media/press-releases/2018/08/27/usda-announces-details-assistance-farmers-impacted-unjustified).

In Tennessee, there is an infrastructure in place for participation in the ATP program. The Tennessee Department of Agriculture has worked with FAS on trade promotion of agricultural and food products produced in Tennessee and has participated in FAS sponsored trade missions as part of a state-level trade promotion. Additionally, the Southern United States Trade Association (SUSTA), of which the state of Tennessee is a member, helps small- and medium-sized companies in the South promote food and agricultural products to foreign markets. Through the Market Access Program, FAS has partnered with SUSTA and businesses to share the costs of overseas marketing and promotional activities that help build

commercial export markets for U.S. agricultural products. Funding for SUSTA is primarily provided by the Market Access Program, which is also administered by FAS and operates similar to the ATP.

Conclusion

American agriculture has and may continue to be significantly impacted by retaliatory tariffs from China, Mexico, Canada and the European Union. The duration and the magnitude of the impact has yet to be determined. However, the USDA implementation of the Market Facilitation Program, the Food Purchase and Distribution Program and the Agricultural Trade Promotion Program will alleviate some of the short-term negative impacts for this production year. According to the USDA, payments from the Market Facilitation Program to producers will commence shortly after the start of the sign-up period on September 4, 2018 and continue into 2019. Purchase opportunities from the Food Purchase and Distribution Program and activities from the Trade Promotion Program are expected to become available in due course. For more information farmers can visit their local FSA office, go to farmers.gov/MFP, or visit ams.usda.gov/selling-food/purchase-announcements-to-find-new-purchase-announcements.
